About me

My name is Vadim 🙋. I work as a JavaScript developer with a focus on frontend development. I have a passion for designing website layouts and interfaces. I enjoy creating visually appealing designs that enhance the user experience. In addition to frontend development, I also have experience in backend development.

I strive to build robust and efficient applications that meet the needs of users. I am dedicated to continuously learning and staying up-to-date with the latest technologies and best practices in the field of web development.

## Fullstack JS Developer in ООО Спектр

September 2021 — currently, 1 year 8 months

[Spektrtruck.ru](#) [Design sistem presentation](#)

About company

SPEKTR Ltd. is engaged in: delivery of various world brands of warehouse equipment to the Russian market, service maintenance of various equipment for warehousing.

Achievements

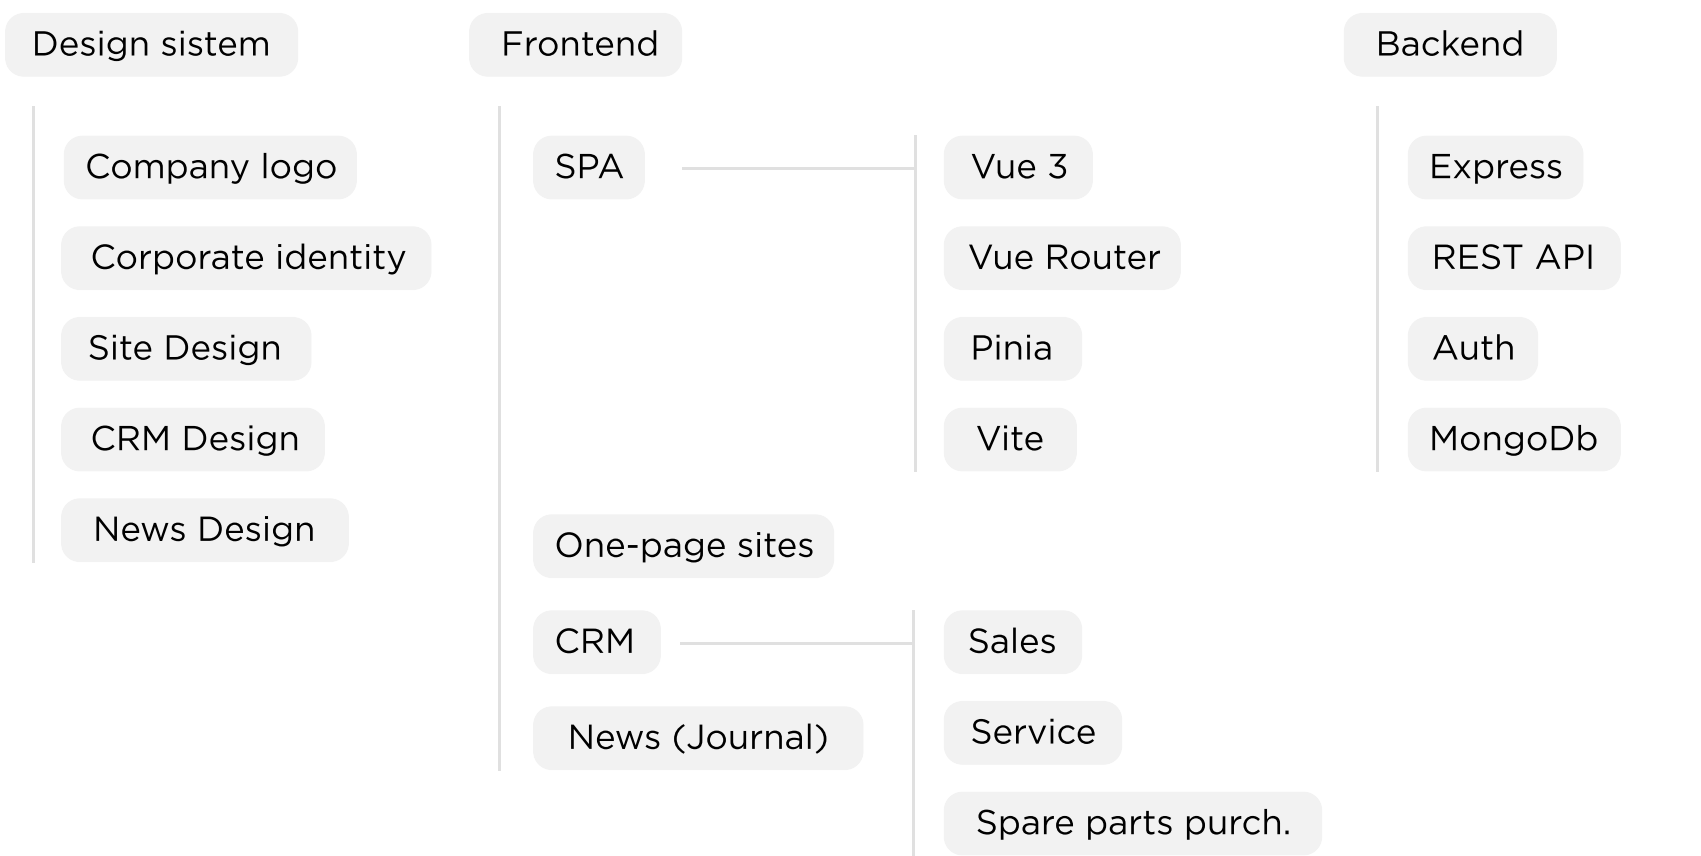

The old site was outdated and had low traffic, the restart of the site and the development of a new design led to a sharp increase in attendance in the first month after the launch, thereafter the dynamics was only positive;

SPA - frontend and backend systems, allowed to speed up site loading and improve the user experience, which many times led to an increase in the time spent by users on the site

Development of crm for internal employees greatly simplified the processes of internal management and processing of service orders + overall integration of the spare parts manager and service manager's office, improving the performance of sales managers;

Creation of the news section of the site in the format of "magazine" in the future will help to increase the awareness of users about the novelties of the company and improve communication between the company and customers.
